ABOUT ME

Hardworking job seeker with 2 years of commercial experience. I am skilled in writing business logic and adaptive UI using React and other auxiliary libraries. I'm a fast learner and not afraid of challenging tasks.

WORKING EXPERIENCE

FRONT-END DEVELOPER IN SOWTWARE

AUGUST 2022 - JANUARY 2023

Was developing a Crypto/Stock portfolio overview app where you could follow your assets and see price changes as well as growth or drawdown of your portfolio, watch signals that could help users to decide when to buy or sell an asset, etc. My task was to write business logic and UI according to the mockup.

FRONT-END DEVELOPER IN ODYSSEAN

MAY 2023 - FEBRUARY 2025

PatronBadge

I was developing a fundraising service for charities. I was the only one front-end developer on the project, my responsibilities included writing business logic, creating layouts, code refactoring, page loading optimization, communicating with the back-end developer, designers, marketers and project manager. In some cases, I made decisions about the choice of tools for creating the service by myself.

PrepYourLesson

PrepYourLesson is a place where teachers can sell their teaching materials. My role on this project was to support it, optimize page loading speed, communicating with the back-end developer, extend the functionality (especially seo and SSR) and design according to the technical tasks.

EDUCATION HISTORY

CURSOR EDUCATION

ADVANCED FRONT-END COURSES

July 2020 - October 2020

NATIONAL UNIVERSITY OF THE STATE FISCAL SERVICE

2014 - 2019

- Master of law
